SUMMARY

Motivated Data Analysis fresher with experience working on academic and personal data projects involving data cleaning, visualization, and insight generation. Strong understanding of SQL queries, Python-based analysis, and dashboard creation. Looking for an opportunity to apply analytical thinking and problem-solving skills in a professional setting.

SKILLS

Programming Languages	C, C++, Python
Databases	SQL
Data Visualization	Excel, Power BI
Tools & Technologies	Git, GitHub
Soft Skills	Communication, Teamwork, Problem Solving, Fast Learner

EXPERIENCE

Project Engineer Intern, Embel Prototyping Solutions

Jul 2025 – Oct 2025

Responsibilities:

- Collaborated with cross-functional teams to design, test, and deploy web-based applications and database solutions aligned with project requirements.
- Applied debugging techniques with the IT team to resolve technical issues and improve system reliability.

PROJECTS

AgroGuide: Crop Recommendation System for Sustainable Agriculture

Role: Backend Developer & Team Lead

- Final Year project based on a Machine Learning system designed to help farmers and agricultural professionals select the most suitable crops.
- Developed a machine learning model to recommend crops based on soil parameters such as nitrogen, phosphorus, potassium, pH, and rainfall.

COVID-19 Interactive Dashboard & Data Analysis System

Role: Data Analyst & Dashboard Developer

- Project focused on analyzing and visualizing COVID-19 data to track trends in cases, deaths, recoveries, testing, and vaccination across India and globally.
- Designed interactive dashboards in **Power BI** using KPIs, line charts, bar charts, maps, and slicers for dynamic data exploration.

EDUCATION

2021 – 2025 **B.E. (Computer Science & Engineering)**

P.R. Pote Patil College of Engineering and Management, Amravati (SGBAU)

CGPA: 8.6
