SUMMARY

Computer Science graduate with hands-on experience in Python, SQL, GCP, ETL workflows, and cloud-based data processing. Experienced in troubleshooting technical issues and working with Firestore, Cloud Storage, and BigQuery. Strong foundation in operating systems, DBMS, and problem-solving, with a keen interest in cloud operations and enterprise application support.

SKILLS

Programming & Scripting: Python, SQL, C++, Bash/Shell Fundamentals
Cloud & Data: Google Cloud Platform (GCP), Firestore, Cloud Storage, BigQuery, ETL
Databases: SQL, MySQL, DBMS
Systems & Operations: Linux Fundamentals, Operating Systems, Networking Fundamentals
Web Technologies: HTML, CSS, Flask
Tools: Git, GitHub, Jupyter Notebook, Google Colab, VS Code
Core Concepts: Cloud Computing, OOP, Data Processing, Deployment Fundamentals

EXPERIENCE

Data Engineer Apprentice, ThinkBridge Feb 2026

- Worked with GCP services including Firestore, Cloud Storage, and BigQuery for cloud-based data processing.
- Developed Python and SQL-based ETL workflows for data extraction, transformation, loading, and validation.
- Processed Firestore-triggered events and stored transformed JSON data in Google Cloud Storage.
- Troubleshoot cloud service configurations, permissions, and ETL pipeline issues to reliable data processing.

Project Engineer Intern, Sonder Prototyping Solutions Jul 2025 – Oct 2025

- Analyzed business and operational data to identify key revenue-generating areas and support decision-making.
- Developed and tested web application modules using Python and SQL to support project requirements.
- Collaborated with cross-functional teams to gather requirements, troubleshoot issues, and improve performance.

PROJECTS

AgroGuide – Crop Recommendation System

Role: Backend Developer & Team Lead

- Led a team in developing a machine learning-based crop recommendation system for sustainable agriculture.
- Developed backend functionalities using Flask and integrated ML predictions seamlessly into web applications.
- Implemented weather forecasting and user authentication features to enhance overall application functionality.
- Provided crop-specific recommendations and cultivation guidance for improved agricultural decision-making.

COVID-19 Interactive Dashboard & Data Analysis System

Role: Data Analyst & Dashboard Developer

- Analyzed COVID-19 datasets to track cases, recoveries, deaths and vaccination across India and globally.
- Built dashboards using Power BI with KPIs, maps, charts, and slicers for dynamic analysis and reporting.
- Derived actionable insights from COVID-19 data to visualize pandemic trends and support decision-making.

EDUCATION

2021 – 2025 **B.E. Computer Science & Engineering** CGPA: 8.6
P.R. Pote Patil College of Engineering and Management, Amravati (SGBAU)
