SUMMARY

Computer Science graduate with hands-on experience in Python, SQL, Machine Learning, and Full-Stack Web Development. Led a Smart India Hackathon team and developed data-driven applications including a Crop Recommendation System and Customer Churn Prediction model. Passionate about building scalable software solutions and leveraging data analytics to solve real-world problems.

SKILLS

Programming Languages : Python, C++, SQL

Web Technologies : HTML, CSS, Flask

Data Analysis / Visualization : Power BI, Excel, Pandas, NumPy, Matplotlib

Machine Learning : Scikit-learn, Data Cleaning, EDA, Feature Engineering, Regression, Classification

Tools : Git, GitHub, Jupyter Notebook, Google Colab, VS Code

Core Concepts : DSA, OOP, DBMS, Operating Systems

EXPERIENCE

Project Engineer Intern, Sonder Prototyping Solutions

Jul 2025 – Oct 2025

- Analyzed business and operational data to identify key revenue-generating areas and support decision-making.
- Developed and tested web application modules using Python and SQL to support project requirements.
- Collaborated with cross-functional teams to gather requirements, troubleshoot issues, and improve performance.

PROJECTS

AgroGuide – Crop Recommendation System

Role: Backend Developer & Team Lead

- Led a team in developing a machine learning-based crop recommendation system for sustainable agriculture.
- Developed backend functionalities using Flask and integrated ML predictions seamlessly into web applications.
- Implemented weather forecasting and user authentication features to enhance overall application functionality.
- Provided crop-specific recommendations and cultivation guidance for improved agricultural decision-making.

Customer Churn Prediction

Tools: Python, scikit-learn, Matplotlib

- Processed and analyzed 10,000+ customer records using Python and Pandas to identify customer churn patterns.
- Conducted data cleaning, EDA and feature engineering to improve data quality and support model development.
- Built and trained a Logistic Regression model using Scikit-learn, achieving 82% prediction accuracy consistently.
- Generated business insights and recommendations to support customer retention and reduce churn effectively.

COVID-19 Interactive Dashboard & Data Analysis System

Role: Data Analyst & Dashboard Developer

- Analyzed COVID-19 datasets to track cases, recoveries, deaths and vaccination across India and globally.
- Built dashboards using Power BI with KPIs, maps, charts, and slicers for dynamic analysis and reporting.
- Derived actionable insights from COVID-19 data to visualize pandemic trends and support decision-making.

EDUCATION

2021 – 2025 **B.E. Computer Science & Engineering**

P.R. Pote Patil College of Engineering and Management, Amravati (SGBAU)

CGPA: 8.6
